To whom it may concern

Easts Hockey Club first engaged Nicholas Copeland Builders in 2009 to be the building contactor on our major club redevelopment. A key benefit of selecting them as the contractor was they employ their own carpenters, bricklayers and concreters which allows them to control the quality and costs of the project. They were also involved with coordinating all other trades including the negotiation on price and timing. They completed our project in good time and under our budget. During the construction they suggested several practical improvements to our design which helped the overall flow of the hockey centre.

We found their staff to be helpful, professional and their workmanship to be of a high quality. Since this project was completed we have re engaged them to construct several other buildings at our club in the Clem Jones Centre.

We would recommend them to anybody looking for a quality building contractor, be the project large or small.

If you would like to discuss the above further I can be contacted on 0413 335 030.
